

SYED AYAAN HUSSAIN

Aspiring AI Engineer & Data Scientist

syedayaan.h0@gmail.com | +92 319 7962011 | Karachi, Pakistan
github.com/AyaanHussain1 | linkedin.com/in/syed-ayaan-642178257

TECHNICAL SKILLS

Programming Languages: Python, SQL (MySQL)

Data Analysis & Visualization: NumPy, Pandas, Matplotlib, Seaborn

Machine Learning & AI: Scikit-learn, Neural Networks, Deep Learning Basics, RAG Pipelines

Developer Tools: Git, GitHub, Streamlit

EDUCATION

IQRA UNIVERSITY

Bachelor of Science in Computer Science (BSCS)

2025 – Present

CGPA: 3.2 / 4.0

PAKISTAN SHIP OWNERS GOVT COLLEGE

Higher Secondary School Certificate (HSSC)

Passed: 2025

Percentage: 72%

CORE PROJECTS

RAG-based Video AI Teaching Assistant | Python, Whisper, RAG

May 2026

- Built an AI assistant pipeline to convert video audio into text and create a searchable data index.
- Used Whisper for video-to-text transcribing and saved vector embedding matrices locally via joblib.
- Implemented Cosine Similarity logic to accurately search context and reply directly to user questions.

Karachi Housing Price Predictor | Python, Scikit-learn, Pandas

May 2026

- Created a machine learning workflow to clean, transform, and predict property pricing in Karachi.
- Developed data processing steps and missing value rules packaged inside a clean pipeline.pkl file.
- Trained predictive models using Scikit-learn and built a basic neural network to maximize accuracy.

Laptop & Book Recommendation Systems | Python, Streamlit, NumPy

June 2026

- Designed and deployed recommendation algorithms based on content filtering vectors.
- Processed text-based feature configurations efficiently using Pandas and NumPy matrix logic.
- Built a minimal, highly responsive live web interface for user tracking search requests using Streamlit.

ADDITIONAL PROJECTS

WhatsApp Chat Analyzer: Extracted patterns and text stats from raw chat history to generate structural graphs.

SMS & Email Spam Classifier: Trained a text-classification machine learning model to block unwanted messages.

Olympics Data Analyzer: Developed an interactive data visualization dashboard tracking historical country performance.

POSITIONS OF RESPONSIBILITY

Project Team Lead | Iqra University

2025 – Present

- Led multiple student teams responsible for execution and development of academic software builds.
- Assigned coding tasks, managed project deadlines, and handled code collaboration structures using GitHub.
- Guided team members through code reviews, data processing logic, and debugging python scripts.

CERTIFICATIONS & ACHIEVEMENTS

- **HackerRank:** Completed the Python / Problem Solving skill certification.
- **Technical Focus:** Dedicated to core data engineering workflows, machine learning models, and system automation scripts.
